Technical Skills

Proficient:

Java •Hibernate •Spring •JUnit •Selenium

Mongodb •Sql •JavaScript •Bootstrap

Reacts •Jquery •Json

Familiar:

Python •C++ •Nodejs •Bash •Git

Soft Skills

•Punctual

•Persistent

•Hard Working

•Desire to learn

•Interpersonal Character

Certifications

MICROSOFT CERTIFIED PROFESSIONAL

Windows Server Administration

Extracurricular

•Strong interest in data analytics, mathematical modeling and forecasting

• Regular attendee of Timișoara Web Designers & Developers Meetups

Experience

TECHNEST INNOVATION | FRONT-END DEVELOPER

Jun 2019-Pres | Arad

- Implemented Agile/Lean development process.
- Develop and maintain Web applications using newest back-end and front-end technologies, such as: React, Selenium, Mocha and Cucumber.
- Implement and test new functionalities based on given documentation, create automated tests to ensure a continuous working.

SOFTWARE DEVELOPMENT ACADEMY | JAVA DEVELOPER

October 2018-June 2019| Timișoara

Projects focus intensive program with emphasis on Java, Spring, Mongo, Hibernate and JavaScript (MERN) stack.

- 360+ h practical workshops focused on: computer programming, software craftsmanship, software testing and object-oriented design procedures and techniques.
- Created and implemented a collaborative design plan for a team project: „Online blood donation, reservation management system" - functional web application using latest web technologies: Java, Spring Boot and Hibernate to build up the persistence layer, Thymeleaf and Bootstrap to build front-end services. The application allows users registration and help hospitals to keep records of donor's data in case they need to communicate with them.
- Designed and implemented a prototype of an online order management system. Hands on experience with Spring MVC, Spring Data, Hibernate, JPA; Integrate front-end and back-end technology into a functional application.
- Designed and implemented a prototype of a stock trading simulator. With an initial cash amount user buy and sell stocks, simulating real time stocks price variability and displaying resulted cash flow.

WIPRO Limited-| FRONT-END DEVELOPER

Mar 2018-Oct 2019| Timisoara

- Developed a total of 6 mobile and web apps.
- Collaborated on 15+ projects, tested, and debugged 12+ applications.
- Contributed to developing back-end code for over 8 e-commerce websites.
